SnapShot Feature Release Notes

These release notes support the new enhancements made to the Folder Based Asset SnapShot Push dialog.

Contents:

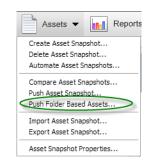

- 1. Overview of the new enhancements made to the Folder Based Asset SnapShot Push dialog
- 2. Product Support

1. Overview of new enhancements made to Folder Based Asset Push Dialog

SnapShot has just enhanced the Folder Based Asset Push dialog box; enabling users to auto select Dashboards and the corresponding reports. The login screen to the Folder Based Asset Push feature has been changed as well.

To access the Folder Based Assets, follow the steps below:

1. Select the option from the Assets Menu

2. Once selected, the new Push Folder Based Asset dialog will appear promoting the user to log into the Destination Org.

🔅 Push Folder Base	d Assets
other assets becau	ds, Documents, and Email Templates are a little different than se they are stored in salesforce Folders and are potentially very assets are NOT included in your asset snapshots and must be een Orgs.
DESTINATION 0	SOURCE Org is adamss@df.com. Please login to the rg that you want to write the Reports, Dashboards, mail Temolates to.
Username:	
Password:	
Location:	Sandbox account
,	/ersion 18 of the Metadata API works on Enterprise and Unlimited edition accounts and requires the permission to 'Modify All Data'.
	Next Cancel

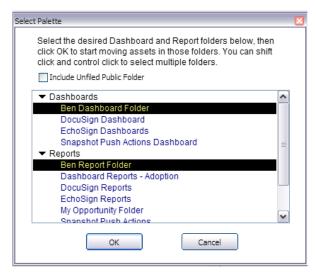

3. Once you have logged in, the Push Folder Based Assets dialog will appear. Here you can select the desired folders from the drop down menu to the left.

SOURCE ORG: adamss@df.com	STEP TWO: Select the folder based assets to me between Orgs:	ove DESTINATION ORG dreamteamsuite@gmail.com
Select the desired folder(s):	Click right arrow to move selected assets into the job list below:	Check For Errors Without Making Chai Roll Back All Changes If There Is An E Change Everything Possible And Igno Run All Apex Tests Before Push Ignore Warnings During Push Results
		Dynamically Create Any Missing Folde

This drop down menu provides the following options. As before, you can choose either all folders of the selected asset type (documents, email templates, reports or dashboards), or selected folders of the selected asset type. SnapShot has just added the Dashboards & Reports option. This option allows users to select dashboard and report folders simultaneously so that related assets can be pushed at the same time.

Select the desired folder(s):
None
None
All Documents
All Email Templates
All Dashboards
All Dashboards & Reports
All Reports
Selected Documents
Selected Email Templates
Selected Dashboards
Selected Dashboards & Reports
Selected Reports

4. If you decide to select the Dashboards & Reports option, once selected, the Select palette will appear where you can select the folders that contain the assets that you want to deploy.

5. Once selected, SnapShot will immediately begin loading the selected folders from the Source Org. The results are displayed in the first box.

SOURCE ORG: STE adamss@df.com	P THREE: Move selected assets into destinati and click push	ion list DESTINATION ORG dreamteamsuite@gmail.cor
Select the desired folder(s): Selected Dashboards & Reports♥ Dashboards Unpackaged Ben Dashboard Folder Ben Dashboard Ont Reports Unpackaged Ben Report Folder Ben Report Two	Click right arrow to move selected assets into the job list below:	Check For Errors Without Making Cha Roll Back All Changes If There Is An E Change Everything Possible And Igno Run All Apex Tests Before Push Ignore Warnings During Push Results
Done	Cancel	Dynamically Create Any Missing Fold

6. Next, select the dashboards that you want to deploy. Use the new Super Select arrow (the one with the '+') if you want to automatically move any reports associated with those dashboards to the push job list. Otherwise, use the normal right arrow to manually select which reports to include in the push job list. The Super Select option is only active when choosing the Dashboards & Reports option.

When using the Super Select option, if the dashboards selected contain reports that are in folders that have not been loaded, then you will receive the following message indicating the required folders needed.

Note: If you strictly select a report and not a dashboard from the Select Palette displayed above and then select the Super Select, all your will see are the reports and not the dashboards in the dialog box.

2. Product Support:

The purpose of this document is to highlight the the new enhancements made to the Folder Based Asset SnapShot Push dialog. Please direct all questions to DreamFactory Support at one of the following Support Options.

Live Chat – You can initiate a Live Chat with one of our Success Engineers by simply clicking on the Support Menu and selecting the Live Chat option.
