## 1. Overview of the Snapshot Creation Limitations

Upon creating a Snapshot, three new options have been added to the "Limit the information included in the snapshot" dialog.

Now, once the user clicks on the Limit the information button, they will see that they can now choose No Profiles, No Objects and also add Object Translations to their Snapshot if they wish. Previously, users only had the options to choose all or selected profiles and objects.

## 2. Overview of the Additional Analytical Data added to the Asset View

Users now have the ability to see what percentage of the Asset Snapshot is compiled by individual Assets. By hovering over a particular Asset in the Asset list on the left hand side, users can easily see what percentage of the Asset Snapshot is comprised of Objects, or Page Layouts, etc...
